-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 28 July 2005.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Amendment

1. This communication is in response to applicant's 02/24/2005 Amendment in the application of Tam et al. for the "Unified distributed architecture for a multi-point video conference and interactive broadcast systems" filed 11/38/2000. Claims 1, 2, 6-9, have been amended. Claims 1-18 are pending in the present application.

Remarks

2. Applicant's amendment to the claims and remark have been considered but are moot in view of the new ground(s) of rejection, and will be examined as discussed below. Furthermore, the Final rejections of record are withdrawn in view of the newly Election/Restriction. Accordingly, This action is made Non-Final. The Examiner apologizes for any inconvenience this may have caused.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9 drawn to the Conversion between signaling protocols: Subject matter including means for converting format and timing of control or supervisory information exchanges between two systems governed by different set of communicating rules. Classified in **class 370, subclass 467**.

Art Unit: 2665

II. Claims 10-12 and 17, 18 drawn to the video distribution system with upstream communication: Subject matter comprising means or steps for the unidirectional distribution of video programs with either the upstream or bidirectional transmission of further diverse data communications or services in a network. This subclass includes systems in which system operators interface with transmitter-side elements, and users interface with receiver-side elements, in order to facilitate, through interaction with such elements, the dynamic control of data processing or data flow at various points in the systems. Classified in **class 725, subclass 105.**

III Claims 13-16 drawn to the Client/server: Subject matter wherein at least one local computer provides a user interface and performs local data processing to interact with at least one remote computer which implements data processing (e.g., data management, data sharing) within a generic time-sharing environment in response to the local computer to transfer data between the local computer and the remote computer. Classified in **class 709, subclass 203.**

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the format and

Art Unit: 2665

timing of control or supervisory information exchanges between two systems, which does not include the particular listed of the invention II, such as video distribution system with upstream communication. Invention III has separate utility such as the dynamic control of data processing or data flow at various points in the systems, which does not include the particular listed of the invention I and II. See MPEP ' 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37.CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
